

# HOMEMADE FESTIVE DECORATION IDEAS

Save the Children

## STRING AND CARD TREES

These are fairly simple to make. All you need is some green string or wool and some card or cardboard (preferably recycled). Cut the card into triangles and wrap your string around until it is covered. Use a glue gun or craft glue to stick down the string.

## SPOON OR PINE CONE TREES

For this decoration you can either use layered plastic spoon heads layered and glued on top of one another or pine cones. Paint your 'trees' green and cover with flour for a snow effect. You can even glue your trees on top of old corks in order to create a base.

## PINE CONE ORNAMENTS

To create this you'll need pine cones, some pom poms, string, craft glue or a glue gun and paint (optional). If you would like to paint your pine cones do so before sticking on your pom poms. Once your paint and the glue for your pom poms are dry, attach a string to hang your ornament from.
